

UNIT – V

FINANCING EDUCATION IN INDIA

5:00 Introduction

In this unit, titled 'Financing Education in India' is to discuss about the mechanism of financing education in India, Role of Union Government, State Government and Local Bodies, Role of UNESCO, UNICEF, UNDP, UNFPA and World Bank in financing education, Funding System of education in India viz Public, Fees, Student loans, Education Cess, Industry and External aids.

5:01 Mechanism of Financing Education in India

Education in India is financed by both central and state governments. The governments at these levels provide funds for their own institutions and to institutions set up by private individuals or societies to whom grants are made on the basis of grants-in-aid policies of the government. The state governments differ in terms of the system of grants

and they also differ by levels of education. Generally, private institutions which come under the purview of grants-in-aid code are given recurring and non-recurring grants.

The recurring grant includes a salary grant, a hostel grant and a maintenance grant. The non-recurring grants include a building grant, an equipment grant, etc. Sometimes ad hoc grants are also given to these institutions for specific purposes such as the promotion of science and craft teaching, etc. The grants-in-aid policies also help to keep a check on and ensure certain levels of standards in terms of teacher qualifications, fees, maintenance of accounts, etc. Moreover, all the institutions receiving grants-in-aid are subjected to governmental inspection and supervision. However, it should be noted that in practice, the grants-in-aid policies are hardly used to maintain quality in education.

The Constitution of India has categorised the government functions into three:

List 1 : list of union or central government functions;

List 2 : list of state government functions;

List 3 : list of concurrent functions.

In the case of concurrent functions the central and state governments enjoy equal power of legislation, subject to a provision which protects and upholds the supremacy of the central government in the event of a conflict between the central and state legislation.

Education was placed under List 2 (list of state functions) except for a few parts of education which were placed under List 1.

The following sectors of education were listed as functions of the central government (List 1): Central universities, Union agencies and institutions for professional and technical education, Union agencies for co-ordination and determination of standards in institutions for higher education and any other institution declared by the Parliament to be an institution of national

importance. These provisions of the Constitution resulted in the establishment of such institutions as the Central Board of Secondary Education (CBSE), the University Grants Commission (UGC), Deemed Universities, the National Council of Educational Research and Training (NCERT) and the National Institute of Educational Planning and Administration (NIEPA). Vocational and technical training of labour was listed in the concurrent functions. All other areas and sectors of education were under List 2.

In 1976, through a constitutional amendment, education was shifted from the state list to the concurrent list. This legalized the involvement and dominance of the central government in educational development. Many state governments opposed this shifting of education to the concurrent list. Though education was put under the concurrent list, it did not show any difference in terms of organisation and financing of education in India.

The Central Government intervenes in education in three ways:

- i) The Central government has its own **central sector in education**, which includes, besides the sectors listed in the Union List (List 1), the Regional Colleges of Education, Central Schools, National Scholarships, the programmes of University Grants Commission (UGC) such as the creation of Centres of Advanced Study, etc. and National Council of Education and Research (NCERT). Administrative as well as financial functions of this central sector are the total responsibility of the Central Government. These activities are planned, implemented and financed exclusively by the Centre.
- ii) There is a sector known as **centrally sponsored sector**, the responsibility of which the States do not accept on their own. The central government could however persuade the State governments to accept the responsibility of their implementation i.e. though they constitute Central plan, States act as executive agencies. These kinds of activities include promotion of Sanskrit, promotion of Hindi in non-speaking states, promotion of students tours, etc.

- iii) The centrally assisted sector which includes activities in the promotion of which the centre is actively interested, though they are embodied in the state plans. The states only partially accept the financial responsibilities of this sector. The opening of non-formal education centres, enrolment of handicapped students in the integrated schools, etc., are some of such activities. The financial contribution of the cost of these activities might vary between 25% to 100% of the total cost of the activities.

The central grants of all the three kinds often lead to the decision making at the state level being replaced by central decision and to that extent such grants erode state autonomy.

5:02 Sources of Income for Financing Education

There are multiple sources of finances for education in India. These sources can be broadly classified into external and internal or domestic sources of financing as shown in the following figure. External sources do not form a significant part of educational finances in India. The domestic

sources of funding are broadly divided into **public** and **private sources**. The public sources include contributions made by central, state and local governments. The private or non-governmental sources include fees and other household expenditures incurred by the direct beneficiaries (students/parents) of education and endowments and donations made by individuals, trusts, etc. Among the private sources, fees are compulsory payments whereas others are voluntary contributions.

We shall first discuss the funding of Central, State and local bodies for education.

Before getting into details of the role of Central and State Governments funding in Education, we shall present the following table, how bulk of the expenditure spent on education is shared by the Central and State Governments.

Five Year Plans	Central Government	State Government
I	25	75
II	25	75
III	26	74
IV	33	67
V	30	70
VI	22	78
VII	37	63

5:03 Role of Central Government in Financing Education

Since independence the Central Government has started spending increasing amount of money on education due to the following three reasons.

- ✦ After independence, the need for education has increased.

- ✦ Government is trying to improve quantitative expansion and qualitative improvement of education.
- ✦ Manpower with education and skills is needed for the economic development of the country.
- ✦ The Central Government must assist the states in realising the constitutional provisions of providing free and compulsory primary education to all children in the age group of 6-14 years.
- ✦ The Central Government must assist the backward states for providing better educational opportunities to pupils.
- ✦ Central funds must be utilized for providing equality of opportunity.

5:03:1 Three Ways of Central Government Providing Financial Assistance to States

1. Central Government performs educational functions through fully funding Central

Universities, Central Schools, Regional Colleges of education (Now known as Regional Institutes of Education), National Council for Educational Research and Training (NCERT), University Grants Commission (UGC), CBSE, National Institute of Educational Planning and Administration (NIEPA) and other Union agencies and institutions for professional and technical education as well as Union agencies for coordination and determination of standards in institutions of higher education and any other institution declared by the Parliament to be an institution of national importance.

2. Central Government sponsors schemes fully financed by it but implemented by States. E.g.: Programmes to promote Sanskrit, Promoting Hindi in non-Hindi speaking States, promotion of students' tour etc.
3. Central Government partially finances some programmes, planned and implemented by the State Governments (E.g.) Opening of non-

formal education centres, enrolment of handicapped students in the integrated schools etc.

5:03:2 Expenditure for Education by the Central Government

Expenditure on education of the Central Government is broadly divided into the following two sectors. (i) School Education and Literacy (ii) Higher Education.

The details of expenditure incurred (in crores) in these two sectors for the three financial years 2019-20 to 2021-22 are presented in the following table.

Sector	2019-20	2020-21	2021-22
School Education and Literacy	52,521	52,189	54,874
High Education	36,916	32,900	38,351
Total	89,437	85,089	93,225

Details of Major Heads of Expenditure on School Education & Literacy Sector alone (in crores) for the three financial years 2019-2020 to 2021-2022 are follows:

S.No.	Major Head	2019-20	2020-21	2021-22
1.	Samagra Shiksha	32,377	27,957	31,050
2.	Teacher Training & Adult Education	-	120	250
3.	Mid-day Meal Programme	9,699	12,900	11,500
4.	Autonomous Bodies	10,077	10,395	11,192
5.	Scholarship Schemes	332	350	350
6.	Others	36	467	532
	Total	52,521	52,189	54,874

Major heads of Total Expenditure on Education (in%) for 2021-2022 are as under :

Major Heads	% of Expenditure
i) Samagra Shiksha Abhiya Major Heads (Central Government programme for school education and teacher training)	33%
ii) Autonomous Bodies	12%
iii) Mid-day Meal Programme	12%
iv) Grants to Central Universities	8%
v) Indian Institutes of Technology	8%
vi) UGC & AICTE	5%
vii) National Institutes of Technology & IIST	4%
viii) Rashtriya Uchchatar Shiksha Abhiyan (RUSA)	3%
ix) Student Financial Aid (Scholarship for S.C. & S.T Students, Merit Scholarship, Merit cum Mean Scholarship etc.	3%
x) Others	12%
Total	100%

5:04 Role of State Governments in Financing Education

Education in India is a state responsibility and the bulk of expenditure is borne by the States. States contribute education funds. State like Maharashtra bank on the centre for only 7-10% of its school education spending. But Bihar would get 40-50% of its education funding from the Central Government.

The Finance Commission transfers adequate resources at the end of each plan to each State as follows :

- a) Share in Income-tax
- b) Share in excise and
- c) Lump-sum grant in-aid.

The state recognizes schools and other institutions run by private bodies in accordance with set rules and regulations. It also provides them with suitable aids and grants to run efficiently and effectively. Financial aid is also given to State Universities functioning in the State.

Expenditure held on Education by Tamilnadu

Government (in crores) during 2021-2022 is presented below :

School Education	32,599.54
Higher Education	5,369.09

Major Heads of Expenditure	Rupees (in crores)
i) Ennum Ezhuthum	66.70
ii) Smart Classroom	20.76
iii) High Tech Laboratories	114.18
iv) Touch Screen Tablets	13.22
v) Mid-day Meal Scheme	1,725.41
vi) Smart Classroom (Polytechnics)	10.00
vii) Scholarship	1884.70

5:05 Role of Local Bodies in Educational Financing

Local Bodies like Municipalities, Boards, District bodies, Zilla Parisads and Panchayats run schools in their respective area. They appoint staff, provide equipment and finance to the these schools through local taxes and grants from the State Government. Such educational institutions are directly under the control of these Local Bodies.

For meeting the expenditure, the school committees should receive:

- 1) A certain proportion of the income of the local village panchayat and
- 2) A grant-in-aid fixed on the basis of equalisation.

State grants to local bodies on account of primary education should be based on a combination of the proportional grants, a special grant for backward areas and specific purpose grants. It would be in the interest of education to make it obligatory on municipalities to earmark a specified proportion of their net revenue for primary education. All funds thus earmarked for Primary Education should be entitled to receive grant-in-aid according to rules.

A cess on land revenue should be universally levied in all areas and that the legislation on the subject should provide for the minimum and maximum rates of such levy. In the village panchayats, as in the municipalities, a portion of the total revenue should be earmarked for Primary Education.

5:06 Role of UNESCO in Financing Education

UNESCO supports national education authorities in developing robust and coherent education policies and strategies and in managing their effective implementation all within the context of Sustainable Development Goal 4, which aims to 'to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all'.

At a time of growing inequality, closing the gaps in access to quality education requires a long-term vision and engagement. Many countries suffering financial constraints have made substantial reforms in the area of education management and governance including decentralization, public-private partnerships and autonomy of educational institutions with the financial assistance of U.N.O. In such a context, governments are more eager than ever to learn about effective policies and reforms.

UNESCO offers technical assistance in education policy analysis, the design of education sector development plans and donor mobilization

in support of national educational priorities such as curriculum reform, teacher training and information and communication technologies (ICTs) in education either by sending concerned experts or providing scholarship for those who have creditable academic record till their graduation, to go abroad and pursue their post graduation studies / Doctoral programmes. In the past UNESCO has substantially helped Tamilnadu financing in the yester years, to improve the state's science exhibition in schools. CAPE programme was also launched with the assistance of UNESCO to expand primary education in our country. APEID (Asian Programme of Educational Innovation for Development) was launched in India with the assistance of UNESCO to develop innovative educational technique particularly at school education level. UNESCO also helps in procuring donors for education and coordinate them.

5:07 Role of UNICEF in Financing Education

Too often, public resources don't reach the children most in need. In some places,

policymakers fail to allocate the funds necessary for children to grow and learn in a safe, healthy environment. In others, public finances may not be well managed, reducing the quality or accessibility of health care, education and other services.

Global evidence shows that public spending on children is a smart investment – for children, their communities and entire countries. When governments invest in children, health outcomes improve, incomes rise, economies grow and societies become more cohesive. Despite these benefits, public spending on health and education has stagnated in many parts of the world, and may be insufficient to meet the needs of children.

Challenges in public financial management make matters worse. Weak funding structures may delay teacher payments, resulting in teacher absenteeism and poor learning outcomes for students. In health care, inadequate costing can lead to a shortage of critical medicines, vaccines and other supplies. Management issues can also

diminish hard-won gains, with consequences that ripple across society.

UNICEF's Work

UNICEF works to tackle challenges in public financial management so that all children, especially the most vulnerable, get a fair chance in life. It partners with governments and financial decision makers to influence and support the mobilization, allocation and utilization of domestic public financial resources. Its efforts are :

- ✦ Ensure child-related policy commitments are better reflected in budget processes.
- ✦ Identify cost-effective and equitable ways to deliver services and life-saving supplies, and help governments plan cost and budget for them.
- ✦ Improve the flow and use of budgeted resources for service delivery, including at the subnational level.
- ✦ **Allocate necessary funds from UNICEF's Fund to run the programme for promoting**

children's education and health when any such programme is at the point of break down.

Its work is guided by the commitments countries made in the Convention on the Rights of the Child, the Sustainable Development Goals – which call for the better use of public funds. Domestic resource mobilization, public expenditure tracking and reporting are also central for the Addis Ababa Action Agenda on Financing for Development.

5:08 Role of the World Bank in Financing Education

The World Bank Group is the largest financier of education in the developing world. It works on education programmes in 90 countries and are committed to helping them reach SDG4, which calls for access to inclusive and equitable quality education and lifelong learning opportunities for all by 2030.

The World Bank provides financing, global knowledge, and long-term commitment to help low-

and middle-income countries end poverty, achieve sustainable growth, and invest in opportunity for all. It comprises the **International Bank for Reconstruction and Development** (IBRD), the world's largest development bank, and the **International Development Association** (IDA), one of the largest sources of funding for the world's poorest countries. With the other World Bank Group Institutions as well as partners across the public and private sectors, it is helping build solutions to the global challenges of the 21st century in all major sectors of development. A world where no one lives in poverty and everyone has the opportunity for a better life is within our reach.

The Global Partnership for Education

GPE is a shared commitment to ending the world's learning crisis. World Bank mobilizes partners and funds to support 76 lower-income countries to transform their education systems so that every girl and boy can get the quality education they need to unlock their full potential and contribute to building a better world.

The Government of India and the World Bank have signed a \$500 million **"Strengthening Teaching - Learning and Results for States Programme"** (STARS) to improve the quality and governance of school education in six Indian states - Himachal Pradesh, Kerala, Madhya Pradesh, Maharashtra, Odisha and Rajasthan. Some 250 million students (between the age of 6 and 17) in 1.5 million schools and over 10 million teachers will benefit from the programme.

The STARS programme builds on the long partnership between India and the World Bank (since 1994); for strengthening public school education and to support the country's goal of providing 'Education for All'. Prior to STARS, the Bank had provided a total assistance of more than \$3 billion towards this goal.

5:09 Role of UNFPA in Financing Education

United Nations Family Planning Agency (UNFPA) is formerly named the United Nations Population Fund. The organisation was created in

1969, the year United Nations General Assembly declared, "Parents love the exclusive right to determine freely and responsibly the number and spacing of the children." UNFPA calls for the realization of reproductive rights for all and supports access to wide range of sexual and reproductive health services - including voluntary family planning, mental health care and comprehensive sexuality education.

Despite progress in reducing educational disparities, there remains a wide gap in school attendance between boys and girls in many regions. The HIV / AIDS epidemic is threatening those gains in the hardest -hit countries and downward trends in education may only exacerbate the problem.

Education is a key defence against the spread of HIV. Providing more educational opportunities for girls and young women is a priority for UNFPA. Promoting girls' primary and secondary education and women's literacy was also one of the main items identified in a report UNFPA co-authored.

All UNFPA funding is voluntary. **UNFPA** mobilizes financial resources from governments and other partners to **support programmes that aim to promote sexuality education, education of girls and women's literacy as well as healthcare of women.**

Core resources are contributions without restrictions. UNFPA, with unique expertise and extensive presence in more than 150 programme countries, including crisis situation, uses core funding effectively to provide essential sexuality education and reproductive health services to those most in need.

As of 30 November 2021, the number of UNFPA Core contributors is 88 and UNFPA's target is 110 donors by end of the year 2022.

5:10 Role of U.N.D.P. in Financing Education

The United Nations Development Programme (UNDP) is a United Nations organization tasked with helping countries eliminate poverty and achieve sustainable economic growth and human

development. Headquartered in New York City, it is the largest UN development aid agency, with offices in 170 countries.

The UNDP emphasizes developing local capacity towards long-term self-sufficiency and prosperity. It administers projects to attract investment, technical training, and technological development, and provides experts to help build legal and political institutions and expand the private sector.

The UNDP operates in 125 countries and is funded entirely by voluntary contributions from UN member states. In 2019, UNDP's entire budget was approximately U.S. Dollars 6 billions. UNDP mainly funds for the following :

i) Crisis prevention and recovery

UNDP works to reduce the risk of armed conflicts or disasters and promote early recovery after crisis have occurred.

ii) Environment and energy

As the poor are disproportionately affected by

environmental degradation and lack of access to clean, affordable water, sanitation, and energy services, UNDP seeks to address environmental issues to improve developing countries' abilities to develop sustainability, increase **human development** and reduce poverty.

iii) Poverty reduction

UNDP sponsors developmental pilot projects, promotes the role of women in development, and coordinates efforts between the governments, NGOs, and outside donors.

iv) STD (Sexually Transmitted Diseases) Control Including HIV / AIDS

UNDP conducts health programmes mainly for controlling sexually transmitted diseases including HIV/AIDs and funds such programmes organised by other agencies in member countries of U.N.O.

5:11 Funding System of Education in India

Funding on education in India could be broadly classified into external and internal / domestic

funding. Funding from Governments (Central and State Governments as well as local bodies which are Quasi-Government) constitutes 'Public Funding'. The private or non-governmental sources of funding include funding from the general public in the form of donations, endowments by individuals or trusts and fees and other house-hold expenditure incurred by the students / parents for education. Now let us discuss the non-governmental sources of funding on education.

5:11:1 Funding Education by the General Public

5:11:1:01 Individual / Trusts Donations

Many individuals, trusts and commercial institutions have established approved educational institutions and running them. In addition to this, people belonging to a particular area or community may also contribute for the development of educational institutions in their area, in terms of cash, kind, land, buildings or free labour. Schools may also receive contribution / donation from

parents, business houses or alumni associations for organising programmes, scholarships, purchase of equipment, construction of building or extension of building etc.

There is a decline in the proportion of contributions for education from private sources. Therefore steps are to be taken to augment funds from private sources for education, like including the contribution under 80-G Tax concessions to the tune of 50%.

5:11:1:02 Endowment Funds

A financial endowment is a proper donation of money or property to an institution. The total value of an institution's investments is often referred to as the institution's endowment and is typically organized as a public charity, private foundation, or trust. An endowment may come with stipulations regarding its usage. In some circumstances, an endowment may be required to be spent in a certain way or alternatively to be invested, with the principal to remain intact in perpetuity or for a defined period, which allows for the donation to

have an impact over a longer period than if it were spent all at once. Endowment sources of income includes assistance from religious and charitable agencies, schools landed properties etc.

5:11:1:03 Education Cess

While collecting Income tax, Property tax and Service Tax, Education Cess is also collected at source. Education Cess of 2% for primary education and 1% for secondary education and higher education (total 3% of taxes) is being collected.

5:11:2 Funding Education by Students' Parents

5:11:2:01 Student Fees

Under the Right to Education Act, school education has become free upto Std. X. No tuition fee is levied in Government and Government aided schools. However, privately managed self-financing schools collect fees from students as per State Government prescribed rules. Such fees include tuition fees, admission fees, special fees for various activities and programmes. Further, they

also collect some fees for development and improvement of the schools. Both Government schools and private schools collect annual fees for Parent - Teachers' Association.

As regards higher education, the fees in Government institutions including professional education, are nominal. Most of the students avail fee concession in one way or other. In private self financing colleges they collect tuition fees, admission fees and other special fees for various activities and programmes. They also collect fees towards infra-structure improvement fund.

5:11:2:02 Educational Loans

Nationalized Banks in India, provide long term educational loans to students at low interest rate. Among those who avail educational loans, 45% of students are from Tamil Nadu. The salient features of this loan scheme are, enabling those students who could not avail any other loan, to avail loan from banks and undertaking the responsibility of repaying the loan by themselves in easy monthly instalments, after a period of three years from the

completion of the course or getting employed, whichever is earlier. However, as the unemployment of the educated is increasing day by day, it affects the repayment of loans.

It is proposed that, an alternative student loan scheme specifically for the weaker sections should be evolved. Such a programme must be flexible enough to suit their requirements, which may involve government guaranteed loans, subsidized interest rates, liberal terms of repayment, waiver of interest for those students with less future incomes etc. in addition to a strong student support system.

5:11:3 Funding Education by Governments (Public Funding)

5:11:3:01 Central Government Funding Education

Central Government provides grants - in aids for centrally Sponsored schemes. These schemes are formulated by the Central Government and are included in the Centre's five year plans; the Centre

persuades the states to implement these schemes through financial incentives in the form of grants-in-aid which meet a larger proportion of the total expenditure of the states on those schemes.

5:11:3:02 State Governments Funding Education

The state meets the non-plan and plan expenditure on education at all levels. The non-plan expenditure is met from the states' own revenue supplemented by the financial resources passed on from Centre to the State through finance commission as grants-in-aid of revenue. The finance commission identifies the particular state that would require assistance for the period of the award as per article 275 (1) of the constitution for promoting the welfare of the Scheduled Tribes.

Planning Commission was established in 1950 to formulate India's Five Year Plans, among other functions, (It has since been replaced by a new institution named NITI Aayog). In Grant-in-aid or economic assistance, utilities include certain amount for education purpose. This can be in the form of general grant and special grants, which is provided in case of emergency.

Type of Grant-in-aid

There are 4 types of grants given by government to institutions. They are

i. Salary grant

Salary grant include the salary paid to the teaching and non-teaching staff as per the actual pay scales and allowances.

Salary grants are given to those secondary schools, commerce and agriculture related vocational schools and night schools which are under the control of the Director of Education and have been recognized in the previous academic year.

ii. Non-salary grant

Non-salary grants includes the rent of the building housing the institution and a percentage of the amount of all other admissible administrative expenses apart from salary, allowances and rent.

iii. Building, hostel, furniture, teaching aids, library and laboratory grants.

iv. Other grants sanctioned by the government from time to time.

If the grant is made for general purpose of improvement or expansion of education, it is referred to as general grant whereas if the purpose is specified it is referred to as specific grant e.g. for primary education, for secondary education for building etc.

5:11:3:03 Fund of Local Bodies

Local bodies of Municipal Corporations, Municipal Boards, Zilla Parishad, Panchayat, Samiti etc. provide grants assistance to schools from their revenue for management of education at their command.

5:11:4 Financing Education by Industry

Industrial establishments set up schools / colleges after getting the approval from the respective State Government and fully meet the expenditure of the educational institution thus set up. In most cases, industrial houses set up Charitable Trusts through which they sponsor a school or two and meet the expenditure held for constructing new buildings, expansion of infrastructure in the form of building, equipping library, laboratories or setting up smart classrooms in

schools, offer scholarships to students or create endowments, the interest of which could be utilised for school improvement programmes.

However, there is a decline in the contribution of industrial houses for the cause of education. Various proposals have been made in this regard to increase the educational contribution of industry. Mahatma Gandhi had suggested that industrial establishments set up colleges to train technical human resources required by them, levying cess on imports, encouraging private entrepreneurs to donate for education through tax remissions, corporate social responsibility, surcharge on land revenue and cess on urban property.

5:11:5 External Financial Aids

This can be considered in two ways:
(i) Financial aid given (ii) Providing scholarships and concessions for Indian students under various programmes.

Foreign Aid received by India towards educational development:

Year 2013	421 Million Dollars
Year 2014	806 Million Dollars

Aids given by Countries and International organizations helping India in its educational expansion (in Million Dollars)

	2013	2014
World Bank	322	499
European Union	46	116
U.K (England)	18	109
Germany	32	40

United States of America provide financial assistance to students who pursue their higher education in that country. e.g.: Fullbright scholarship (ii) Financial assistance to students by Ford Foundation etc. England offers commonwealth scholarship. Now, many countries like France, Germany, Italy, Russia, Australia etc. offer educational concessions for those students who pursue education in those countries.

Conclusion

In this unit, mechanism of financing education in India, Role of Union Government, State Governments and local bodies in financing

education, Role of UNESCO, UNICEF, UNFPA, UNDP and World Bank in financing education, Funding system of education in India viz. Public Funding, Funding by the General Public in the form of Donations and Endowments, Education Cess, Financing education by Students' parents in the form of Student fees, Educational loans, Financing of Education by Industry and External aid were discussed in detail.

Review Questions:

1. Discuss the mechanism of financing education in India. (A) [Ans: 5:01 + the chart only under 5:02]
2. Discuss the role of Central Government in financing education. (B) [Ans : 5:03 + 5:03:1 + 5:03:2]
3. Discuss the role of State Governments and Local Bodies in Financing Education. (B) [Ans: 5:04 + 5:05]
4. Discuss the role of the following international bodies in financing education.
 - i) UNESCO (C) [Ans: 5:06]

- ii) UNICEF (B) [Ans. 5:07]
 - iii) World Bank (B) [Ans. 5:08]
 - iv) UNFPA (B) [Ans. 5:09]
 - vi) UNDP (B) [Ans. 5:10]
5. Discuss the role of UNESCO and UNICEF in financing education in India. (A) [Ans: 5:06 + 5:07]
6. Discuss the role of the World Bank and UNDP in financing education in India. (A) [Ans: 5:08 + 5:10]
7. Discuss the various Sources of Income for financing education in India. (A) [Ans : 5:02 + 5:11:1 + 5:11:1:01 + 5:11:1:02 + 5:11:1:03 + 5:11:2 + 5:11:2:01 + 5:11:2:02 + 5:11:3 + 5:11:3:01 + In 5:11:3:02 first two paragraphs only + 5:11:3:03]
8. Explain the types of 'Grants-in-aid' given by government to institutions. (C) [Ans: In 5:11:3:02 except the first two paragraphs]
9. Write a note on the following :
 - i) Financing education by 'Industry'
 - ii) External aids received for educational finance (B) [Ans : 5:11:4 + 5:11:5]
