

REVIEW QUESTIONS

1. Write the nature and scope of the English.
2. What are the four important aims of teaching English in Schools?
3. Write the different values of English.
4. Explain the place and aims of teaching English at different levels of School Education.
5. Explain the importance of Instructional objectives and Behavioural objectives in teaching.
6. Explain the Cognitive Domain and write its Instructional Objectives.
7. Explain the Affective Domain and write its Instructional Objectives.
8. Explain the Psychomotor Domain and write its Instructional Objectives.
9. Explain Revised Bloom's of Taxonomy.
10. Explain how English is correlated with other subjects.

UNIT - 2

TEACHING SKILLS

2.1 Micro Teaching

A Teacher make use of a number of methods and techniques to make the teaching effective, successful and interesting. The technique includes motivating, explaining, questioning, writing on the black board, using teaching aids and so on. The teacher could also make use of non verbal behaviours such as smiling, nodding and gesturing. These group of activities are called skills. So teaching is a various combination of skills.

Microteaching introduces to the teacher trainee to a wide range of teaching skills and allows the teacher trainee to practice each skill one at a time until he or she becomes proficient in the skill.

2.1.1 Microteaching - Definition

The word Microteaching was formed by A.W.Dwight Allen during 1963 defined microteaching "as a scaled down teaching encounter in class size and class time".

Allen Eve defined microteaching "as a system of controlled practice, that makes it possible to concentrate on specific teaching behaviour and to practice teaching under controlled conditions."

Microteaching is reduced teaching. Here new skills are polished - M.C. Knight 1971.

Microteaching is a teacher training technique. Here a teacher trainee teachers a short lesson of about five minutes duration to a small group of students practicing one teaching skill at a time.

2.1.2 Need and importance of Microteaching

In teaching learning process, we can't use single skill. At the same time if a teacher wants to be good in teaching, he should be given training in all teaching skills one by one. For this micro teaching is more useful.

Here each skill is looked liked through microscope. Instead of "What to teach", how to teach is considered. The beauty of this method is, teacher trainee get unproblematic artificial atmosphere instead of natural class room atmosphere. This method is very helpful to improve the teaching skills and to remove the difficulties in teaching.

2.1.3 Characteristics of microteaching

- Microteaching is a teacher teaching technique and not a teaching method.
- It is a real teaching but if focuses on developing teaching skill and competencies.
- In microteaching the teacher trainee practices one specific teaching skill at a time, till he/she attains mastery over the skill.
- Class size is reduced to 5 - 6 students.
- Duration of the class is 5 - 6 minutes
- Microteaching is a cyclic process, the predecided model is plan, teach, feedback, re-plan, re-feedback. It is repeated till the trainee achieves the expected level of mastery.
- Microteaching is practiced in terms of definable, observable, measurable and controllable teaching skills.

2.1.4 Microteaching Cycle

Microteaching is a method that enables a teacher - trainee to practice one teaching skill till he or she attains mastery over the skill. The practice phase is the most important phase of the microteaching programme. In this phase the teacher trainee chooses a specific skill, prepares a micro-lesson plan and teachers a small group of students for a duration of 5 - 6 students. We follow few steps to get training in the skill. These steps are called microteaching cycle.

Steps in microteaching cycle

1. **Selecting a skill** : This involves selection of a teaching skill practiced, knowing its components clearly.
2. **Observing model lesson** : Teacher educator will present a model microteaching lesson plan of the selected skill. Trainee observe it carefully

3. **Preparing Lesson Plan :** Teacher trainee has to prepare a micro-lesson plan for 5 - 6 minutes for the selected teaching skill. In lesson plan all the components of the skill should be presented in an appropriate place.

4. **Teaching :** The trainee teaches the lesson for 5-6 minutes. There will be 5-6 students or peers with teacher educator or one or two peers as supervisor. If possible record the teaching methods of the trainee by video or audio tape.

5. **Feed back:** The supervisor analyses the performance and discusses it with the teacher trainee. The feedback should focus on components of the teaching skill and draw attention to modification for mastering the skill.

6. **Replanning:** In the light of the feedback received from the supervisor or peer observers, the teacher trainee replans her micro-lesson plan by writing another lesson plan or modifying the existing one on the basis of feedback.

7. **Reteaching:** The teacher-trainee reteaches the revised lesson plan to another group of students. The supervisor checks to see whether there is any improvement in skill attainment. This process repeats till the teacher trainee acquires the required level of competency.

2.1.5 Uses of microteaching

Microteaching techniques increases the effectiveness of the teacher training programmes in the following ways

1. Microteaching helps in reducing the complexities of the normal classroom teaching. This helps the teacher trainees gain more confidence in classroom teaching.

2. Microteaching gives the knowledge of various teaching

- It is useful for developing teaching efficiency.
- Microteaching prepares trainee to effective and better teacher.
- Microteaching creates among the teacher trainees an awareness of the various skills of which teaching is composed of.
- Each trainee makes progress in developing teaching skills at his own speed depending his ability.
- Using video or Audio tape enable the trainee to analyse his own teaching performance.
- Feedback enable the teacher-trainee to consciously concentrate on specific behaviour modification.

2.1.6 Micro Teaching Vs Macro Teaching

Sl.No.	Micro Teaching	Macro Teaching
1.	It is a teacher training technique.	It is a method of classroom teaching
2.	Class size is 5 to 10 students	Class size is more than 40
3.	Duration of the class 6-10 minutes	Duration of the class 40 to 45 minutes
4.	One or two teaching Skills used	Maximum Teaching skills are used.
5.	Importance is given to skill	Importance is given to content
6.	It puts the teacher under the microscope	No such arrangement for macro teaching
7.	All the faults of the teacher are observed	No such arrangement for macro teaching
8.	Feed back is given	No feed back is given

Sl.No.	Micro Teaching	Macro Teaching
9.	Opportunity to reteach the lesson	No such arrangement
10.	No importance is given to students needs	Importance is given to students needs
11.	No classroom activities for students	Classroom activities will be given.
12.	It tends to reduce the creativity of the teachers	It increases the creativity of the teachers
13.	Micro teaching can be successful in a controlled environment only	Macro teaching can be successful in any environment
14.	Teaching is relatively simple	Teaching becomes complex
15.	Micro teaching is done with all sensory resources	Macro teaching relies on auditory learning and recall.

2.2 Identification of teaching skills:

A teaching skill is a set of activities or actions of the teacher which are repeated a number of times during the course of teaching.

Characteristics Of Teaching Skills

- Teaching skills are the specific instructional activities.
- Teaching skills are verbal and non-verbal in nature.
- A teaching skill includes activities and actions.
- Teaching skills involve the teacher's activities which are performed in classroom.

Teaching Skills

- Teaching skills develop the communicative competency.
- Teaching skills help effective presentation of content in classroom.

List of Teaching skills given by Allen and Ryan

- Stimulus variation
- Set induction
- Closure
- Teacher silence and non-verbal cues
- Reinforcing pupil participation
- Fluency in questioning
- Probing questioning
- Use of higher order questions
- Divergent questions
- Recognising and attending behaviour
- Illustrating and use of examples
- Lecturing
- Planned repetition
- Completeness of communication

List of Teaching skills given by B.K. Passi

- Writing instructional objectives
- Introducing a lesson
- Fluency in questioning
- Probing questioning
- Explaining
- Illustrating with examples

7. Stimulus variation
8. Silence and non-verbal cues
9. Reinforcement
10. Increasing pupil participation
11. Using blackboard
12. Achieving closure
13. Recognizing attending behaviour

Types of Teaching skills selected for the course

Large number of teaching skills have identified in bringing effective teaching. Allen and Ryan listed fourteen teaching skills and in 1983 Menon gave a list of seventy four teaching skills. A few important skills listed below will be discussed here.

1. Skill of Set induction
2. Skill of Explaining
3. Skill of blackboard usage
4. Skill of questioning
5. Skill of probing questions
6. Skill of stimulus variation
7. Skill of Reinforcement
8. Skill of Non-verbal clues
9. Skill of closure

2.2.1. Skill of Introducing the Lesson / Skill of set induction

In teaching, the way of introducing a lesson is more important. The proverb "Good beginning is half of the work completed." is also fit for teaching. The teacher, before

introducing a lesson, has to motivate the students and establish cognitive and affective rapport with the students. The following are the components of skill of introducing the lesson.

1. Testing previous knowledge
 - a. Preliminary attention gaining
 - b. Use of previous knowledge
 - c. Use of appropriate device
 - d. Link with a new topic
2. Attention Gaining
 - a. Use of voice to focus attention
 - b. Use of audio visual aids
 - c. Use of gesture / eye contact
 - d. Introducing something unusual
3. Motivation stimulation
 - a. To arouse curiosity
 - b. Method of introducing a lesson
 - c. Able to involve students
1. Testing previous knowledge
- 1a. Preliminary attention gaining

Tell the significance of the topic. Give importance of new knowledge in our life situations.
- 1b. Use of previous knowledge

Before giving new knowledge, teacher has to test the previous knowledge which is to be used in the new topic.
- 1c. Use of appropriate device

By way of asking few questions or asking students to write two or three sentences about the new topic.

1d. Link with a new topic

Integrate the old knowledge with the new knowledge. Use the knowledge obtained from Text book, Library book etc. to teach the new topic.

2. Attention Gaining

2a. Use of voice to focus attention

Use clear and bold voice to focus attention.

2b. Use of audio visual aids

Use appropriate teaching aids required to teach the topic to arouse pupil's attention. Charts, slides and power point presentation may be used.

2c. Use of gestures / eye contact

Gestures are indication of conveying messages by body movements. Eye contact is a signal for lack of interest in a person. Much of eye contact shows that it is a threatening attitude.

2d. Introducing something unusual

Relevant to the new lesson / topic, show a chart, photograph or a instrument which is not seen by student.

3. Motivation stimulation

3a. To arouse curiosity

To bring in interest on the topic the teacher must refresh the students properly. He / She should enact to the situation. Must quote a lot of day to day happenings of the new knowledge and give a lot of examples. Self involvement is needed to bring in interest among students. He must become a part of lesson, only then he can arouse curiosity in the students.

3b. Method of introducing a lesson

Special care should be given to introduce a lesson. Teacher has to select any method / technique to introduce a lesson from the methods given below according to the nature of the lesson.

1. Telling relevant statements to teach the new topic.
2. Introduce the lesson after obtaining answers from the students.
3. By way of anecdotes, Explaining or commenting, introduce a lesson.
4. By story telling technique, introduce a lesson.
5. By the method of dramatisation, introduce a lesson.
6. Using teaching aids, we introduce a lesson.
7. By the method of demonstration, introduce a lesson.

3c. Able to involve students

While introducing a lesson teacher can ask students to collect or prepare materials / Aids well in advance.

2.2.2. Skill of Explaining

For an effective learning, explanation in teaching should be done effectively. Explaining bridges the gap in understanding the new knowledge by relating it to the past knowledge. Thus explaining depends upon the past knowledge, the type of new knowledge and the relationship among them. Explanation can be more effective by using simple and clear language for clarity. The following are components of the skill of explanation.

1. Beginning statement
2. Explaining links
3. Concluding statement

4. Questions to test pupil's understanding
5. Irrelevant statements
6. Lacking in continuity
7. Vague words and phrases

1. Beginning statement:

While explaining the beginning statement must include central concept of the content. Statements such as 'Today we are going to drive a formula or prove a theorem' etc. Beginning statement must gain attention of the students.

2. Explaining links:

While explaining the subject matter use suitable link words between the concepts. examples: therefore, that is why, since, because, hence, in order to etc.

3. Concluding statement:

Concluding statement should summarise what the teacher explained. Students can summarise what they learn if concluding statements are meaningful.

4. Questions to test pupil's understanding

Questions asked here are from the content explained. Teacher check the understanding of students by questioning. These questions will also help to analyse the performance of the explanation given by the teacher.

5. Irrelevant Statement

Teachers should avoid irrelevant statements while explaining the topic.

6. Lacking in continuity

Knowledge given in classroom are information, facts, concepts etc. It should be given in sequence and in continuity. Then only the students clearly understands the concepts, facts and information.

7. Vague words and phrases

The teacher should not use vague words and phrases which is not understandable by students. The vocabulary used should be clear and according to the level of students.

2.2.3. Skill of Blackboard usage

Among ten major skills of micro-teaching, the skill of blackboard writing is one of them. Blackboard is the visual aid that is widely used in all sectors of education and training. It is used as a powerful teaching aid for classroom instruction in each and every level of education. Black board is the most suitable tool for providing a holistic picture of the lesson. Blackboards can be suitably used for displaying notes and diagrams during a less and for working through calculations providing theorems, constructing geometrical figures or similar exercises. Thus if the blackboard is used properly, it adds variety to the lesson and draws the attention of the pupil.

Components of the skill of Blackboard usage

The six components of the skill of Black Board usage are

1. Legibility
2. Comprehension
3. Highlighting the main points
4. Compatibility
5. Blackboard summary
6. Contact with the pupil

1. Legibility

The handwriting of the teacher on the black board should be legible so that it can draw the attention of the learners and encourages them to improve their own handwriting. The size of the capital letters should be larger than that of the small letters and the handwriting should be as vertical as possible without deviation from the line. While cleaning the black board rub it from Top to bottom.

2. Comprehension

While writing on the black board, the teacher should be conscious enough of the fact that the size of the letters written on the blackboard should be uniform and large enough to be read by the students in the last law. Overwriting the letters should be avoided. Numbers and letters should be written clearly. Grammatically correct sentences should be written on the black board.

3. Highlight the Main points

The main points or words are written on the black board should be highlighted by underlying them. Colored chalk should be used suitable for the purpose of learner's attention. However too much use of coloured chalk should be avoided.

4. Compatibility

There should be a clear distinction between every letter as well as adequate space should be maintained between individual letters and words. Important words or statements should be written with proper space. Take care that only essential materials should be written on the blackboard.

5. Blackboard Summary

The teacher should take much care and attention to develop a black board summary at the end of the lesson. It makes teaching meaningful and interesting. The black board summary should be so brief that the students can recollect the whole lesson at a glance.

6. Contact with the pupils

The teacher at the time of writing on the blackboard should maintain eye contact with his students. This is necessary for controlling interactions, maintaining discipline, sustaining the attention of the learners.

2.2.4 Skill of questioning

Successful teaching technique is highly depend on questioning. It is a skill that can be used in teaching any subject and any standard. In a person different types of questions, depending upon situation and purpose to be achieved are used. Questions are used to help students recall certain facts, exercise their reasoning ability, and use their power of recognition and discrimination in enhancing their learning. Effective questioning encourages them to reflect over things and ideas and leads them to participate in discussion.

Purpose of questioning

- Questioning is a logical procedure of problem solving
- Questioning is useful for presenting the tentative nature of knowledge.
- The teacher encourages the learners to seek more than one answer for a question
- The teacher uses questioning to achieve learning objectives
- The teacher uses questioning to assess students understanding.

Thus questioning promotes involvement, enhance learning and motivate students.

Let us examine why questioning is an essential skill for a teacher.

- It helps students test their knowledge
- It explicit desired information from students
- It stimulates thinking
- It develops subject matter
- It enable students to analyse the problem
- It enable students to apply their knowledge to a specific new situation.
- It helps students evaluate for themselves their understanding of the subject matter.
- It motivate students to participate in the teaching-learning process.

Questioning stimulates thinking. The level of students thinking depends upon the level of questions asked by the teacher. The level of question is also determined by the level of the responses given by the students. If order to elicit responses at different levels from the students, we can frame questions at different levels.

Questioning is one of the most important skill in teaching. It has to be developed by any teacher. While teacher teaches a lesson he has to ask several questions related to the content. These type of questions are called teaching questions. After completing a lesson, questions will be asked to know whether the students understood the content of teaching. These questions are called review questions. Teachers should be expert in asking questions. Good questions serve many purposes. Questions stimulate thinking. Questions help recalling facts, Concepts and principles. Questions make active involvement in learning. Questions arose the curiosity of the students

Generally these are three levels of question. They are
 1. Low order questions
 2. middle level questions
 3. higher order questions.

Teaching Skills

1. Low order questions.

These questions require the students to recall knowledge that they have learnt. The questions of this level do not ensure understanding of the content or analyzing information, but requires memorization.

Examples : What is the area of the circle?

State pythagoros theorem.

Write the expansion of $(a+b)^2$.

2. Intermediate level of questions.

Explaining the meaning of a concept or statement, compare or differentiate among two things etc are intermediate level of questions.

1. Find any two rational number between $\frac{4}{5}$, $\frac{6}{7}$

2. Find the cube root of $\frac{125}{216}$

3. Surface area of a hemisphere is 1232 cu.cm. Find its diameter.

3. Higher order questions

These type of questions requires the students to use higher levels of intellectual abilities such as comprehension, application, analysis, synthesis and evaluation.

Example:

1. Draw a quadrilateral ABCD using the given measurements and find its area $\overline{AB} = 5.5$ cm , $\overline{BC} = 4.5$ cm , $\overline{AC} = 6.5$ cm , $\overline{AD} = 4.2$ cm , $m\angle CAD = 80^\circ$

2. What are the conditions that triangle $\triangle ABC$ and $\triangle PQR$ are congruent?

2.2.5 Skill of probing

The skill of probing questions involves going deep into pupil's response by asking a series of subsequent questions in a topic. It helps the pupils to give a correct and complete answer. This skill requires the teacher to put a series of questions about the answer given to the first question. It is a major micro-teaching skill.

When students are unable to give the answer or give incomplete answers, teachers use probing questions.

Purpose of probing

1. To motivate the students for correct answer
2. Ask many questions related to the main subject
3. Taking various supportive questions
4. Linking previous knowledge with the new knowledge
5. Creating interest and curiosity among students.
6. Developing the thinking, creativity and analytical ability

Components of probing skill of questioning

There are five main components of skill of probing

1. Prompting
2. Seeking further information
3. Re-Focusing
4. Re-Direction
5. Critical awareness

1. Prompting

Prompting mostly involves verbal questions, visual questions and some visual guidance. In order to help the student to know the correct answer, the teacher gives some indication.

2. Seeking further information

Most of the time students don't give the proper and accurate answer. Then the teacher asks the same question to other students in order to get the correct answer. The teacher asks different aspects of the question in order to seek further information. This also may check the students' knowledge.

3. Re-Focusing

If the teacher is not satisfied with the answer of the student then the teacher puts different situations in front of the students which helps them in the transfer of knowledge of the students.

4. Re-Direction

The teacher tries to know the multiple answer to the question in order to make students think again and again. This will increase the thinking ability of the students, and this may increase the participation of the students in the class too.

5. Critical awareness

If the teacher asks why? how? type of questions then it is called Critical Awareness. This critical awareness among students increase the rational thinking and awareness.

2.2.6. Skill of stimulus variation

While teaching teacher must draw attention of the students. For this, teacher uses some gestures, body movements, makes certain verbal statements, modulating the voice etc. All these behaviours are related to stimulus variation. Components of this skill are :

1. Movements
2. Gestures
3. Change in speech pattern
4. Change in inter action style
5. Secure attention

6. Pausing
7. Oral - Visual switching

1. Movements

Teacher should not stand in one place while teaching. He has to move from one place to another to write on the blackboard, to go near and appreciate a student, to move towards a model etc. Hence, in order to gain students' attention a teacher has to move purposeful movements.

2. Gestures

Use of appropriate gestures according to the content to emphasize importance, to explain emotions, make students to understand the message. Hand movement to describe shape, size, Body movements and facial expression enhance the value of message.

3. Change in speech pattern.

If a teacher explains the content in the same modulation, then it is boring. Hence, in teaching there should be voice modulation to pay attention to a particular point. Modulating the voice on situations, change in pitch, speed of voice will force his student to pay attention.

4. Change in interaction style

Teacher has to plan, how students also involve in teaching. Asking questions from the students, asking student to do a sum on the blackboard, students are encouraged to put few questions and teacher will answer it, to participate students in a seminar or discussion and teacher will tell its result etc. are all called change in interaction. This can be mention in a simple form as

Teacher - Class

Teacher - Student

Student - Student

5. Secure Attention.

While teaching the teacher may use certain statements like, this is important, look at this diagram, listen carefully etc to draw attention. While writing on the blackboard teacher draw attention by using colour chalk for important message or underlined the important points.

6. Pausing

Pausing means introducing silence during teaching. From this act, we can draw attention of the students. While teaching continuously or at the time of asking questions teacher has to plan pausing and create attention.

7. Oral - Visual switching

While the teacher orally explains, student's hearing. When the teacher exhibits aid or writes on blackboard his visual sense is used. Such frequent changes from oral to visual or from visual to oral help to secure pupil's attention.

2.2.7 Skill of Reinforcement / Skill of Appreciation

All these behaviours are related to stimulus variation. The skill of reinforcement refers to the effective use of reinforcers. While teaching, a teacher asks questions and students replies it with correct answer. If the teacher simply goes to another question, then students will not happy. If the teacher reinforce a correct answer with a smile or praise the student, then they will be happy. This is called reinforcement. Teacher has to practice using positive reinforcers and avoid the use of negative reinforcers in the classroom. By Reinforcement, students participation is more in classroom activities. The different components of this skill are

1. Positive verbal reinforcement
2. Positive non verbal reinforcement
3. Negative verbal statement

4. Negative non verbal reinforcement
5. Wrong use of reinforcement
6. Inappropriate use of reinforcement
1. **Positive verbal reinforcement**

When the students give correct response for a question the teacher has to give positive verbal reinforcement such as Good, Very good, Well, Excellent, Continue etc

2. **Positive non verbal reinforcement**

When a student give correct response for a question the teacher may give non-verbal reinforcement expressing happiness or with the help of body language. Teachers should use more positive reinforces so that the students participation is maximum in teaching activities.

3. **Negative verbal statement**

Teacher should avoid using these type of negative verbal reinforces namely, I do not like you, stop it, nonsense, you won't improve, you will fail in the examination etc.

4. **Negative non verbal reinforcement**

Teacher should not use these type of Non-verbal negative reinforces such as facial expression like, frowning, sadness, moving away from responding student, looking at angrily etc.

5. **Wrong use of reinforcement**

When a student gives a wrong answer, teachers should avoid using words like idiot, stop, enough or showing terror face etc. which will hurt student and his enthusiasm will decrease in the subject.

6. **Inappropriate use of reinforcement**

Teacher should not use reinforces in a delayed manner or using it always. Using the above type of reinforcement affects the learning and decrease the motivation of the students.

2.2.8. Skill of Non-Verbal cues

Non-verbal cues has been defined as communication without words. Although verbal output can be turned off, non verbal can't. Teachers use Non verbal cues because

1. Words have limitations. There are numerous areas where non verbal communication is more effective than verbal.
2. Non verbal signs are powerful. Non verbal cues primarily express inner feelings.
3. Non verbal messages are likely to be more genuine.
4. Non verbal signals can express feelings, thoughts etc.
5. Complexity of the verbal message can be given through simple non verbal signals.

Components of the skill

1. Body language
2. Proximity
3. Touch
4. Eye contact
5. Chronemics
6. Smell
7. Vocalics
1. **Body language** : Body movement have specific verbal transactions. To explain the subject matter or to appreciate the students we use body language. To describe shape, size body movements are helpful.
2. **Proximity**: When a teacher wants to convey message to a student or to control a problematic behaviour student he has to go near him and convey non verbally.

3. **Touch** : Physical contact with others is the most basic form of communication and certain situations often communicates that there is a problem.
 4. **Eye contact** : It is a signal for lack of interest in a person. Too much eye contact shows that it is a threatening attitude.
 5. **Chronemics**: With the help of chronemics we can draw attention of the students by means of waiting and pausing. While teaching teacher has to plan waiting and pausing. By increasing the waiting time, you buy for yourself an opportunity to hear and to think. Increase your waiting time upto 5 seconds or longer for slow and shy students and increase in waiting time help students to respondent higher cognitive skills.
 6. **Smell** : We can make identify things using smell. This can be used largely in lower standards.
 7. **Vocalics** :
- Postures** : Postures can be used to determine participants degree of attention or involvement. Posture is understand through such indicators as direction of learn body orientation, arm position and body openness.
- Adornment** : Teacher should wear decent dress. If the school introduce uniform to teachers, teachers should strictly follow them. Lady teachers should not come with more jewels and shining dresses. Clothing should reflect our culture. Hair style should not be funny or attractive.
- Locomotion** : Teacher should not stand or sit in one place during teaching. He has to move one place to another place or go near to a student to convey non verbal messages.

2.2.9. Skill of closure

After teaching a subject matter in a better way, it is better to close it in the same way. Then only the students feel pleasure and satisfaction. At the end of the lesson, it is necessary to make a quick review. What has been taught, applying new knowledge in various situations, associating new knowledge with old knowledge and repeating important points. Various components of this skill are:

1. Consolidation of major points.
2. Application of present knowledge.
3. Linking past knowledge with present knowledge.
4. Linking present knowledge with future learning.
1. **Consolidation of major points**

While teaching teacher has explained so many facts to explain the subject matter. At the end he has to summarise it in a meaningful way. Then only students identify what they have learned.

2. Application of present knowledge

After teaching new knowledge, the teacher has to explain how and where it is used with examples. Then only the students knows the importance of new knowledge and its application. For this the teacher may use problem solving method.

3. Linking past knowledge with present knowledge

After explaining the new knowledge, teacher should linked it with the past knowledge. Then only the students get a clear view about what they learned and feel that their knowledge has developed.

4. Linking present knowledge with future learning

The new knowledge learned by the students should be linked to the knowledge what they will going to study in future or in continuation to this knowledge. From this they will ready to learn more about this knowledge:

- It offers opportunity to practice a real lesson without the complexities of a normal classroom.
- It offers several sources of immediate feedback.
- One skill is learnt at a time which is observable, controllable and practicable.
- It helps in the development of self-confidence.
- It helps the trainees to develop the skill of blackboard writing.
- It is helpful to improve his/her own teaching.
- It makes trainees familiar with various teaching styles, eg. Black-board writing, use of aids, asking questions etc.
- Evaluation procedure of a micro-lesson is more precise, objective and acceptable.
- It saves time and energy of the student-teacher as well as the teacher - educator.
- It focusses attention on the modification and improvement of teacher behaviours in the teaching learning process.

2.3 Model Micro Lessons

Model Micro Lesson - 1

Name of the Teacher Trainee :	:
Class :	:
Skill :	Peer Group
Standard and subject :	Skill of Set Induction
	VIII Std. English

Topic :	Cyber Safety
Time :	5 minutes
Date :	:

Components of the Skill

1. Testing Previous Knowledge (TPK)
2. Attention Gaining (AG)
3. Motivation Simulation (MS)

Episode / Lesson Plan

Teacher: Good Morning Students.

Student: Good Morning Miss.

Teacher: (After all the students were seated teacher proceeding with a smile) How are you? Have all of you had your breakfast? (TPK)

Student: Yes, Miss.

Teacher: What are the activities you do when you are free? (TPK)

Student: (Many answers for this question randomly) We play, watch tv, play games in our mobiles, hear songs....

Teacher: Good. If you are asked to do any project what you will do? (AG)

Student: Miss we will search in Google, You tube, ask our parent, friends.

Teacher: Super. Now-a-days what has become the most important part of our daily life which we cannot leave and we carry it in our hands? (AG)

Student: Mobile phones

Teacher: Excellent. (By showing the picture chart of the different types of computers ask them to identify it) (MS)

Student: (Personal Computer, Laptop, Tablet, Super Computer, Palmtop Computer, Watch Computer)

Teacher: Though we have mobile phones and computers, which connection is very important for that to use? (MS)

Student: Internet Connection Miss.

Teacher: Excellent. Yes, in today's age we cannot even think our life without internet. Can anyone say what are the uses of Internet? (MS)

Student: Miss it is very useful for us to attend online classes, we can book tickets for our travel, even current bill, gas booking can be done by Paytm Google Pay, we can get any information at once with the help of Search engines like Google, Youtube... (All the students participate giving different answers)

Teacher: Very good. Have you heard about 'Cyber'? (MS)

Student: Is it zero.

Teacher: No, Cyber is pertaining to Internet.

Teacher: Ok Student today we are going to see a new lesson 'CYBER SAFETY'. It refers to the safe and responsible use of internet. (Writes the name of the lesson on the black board) (MS)

Student: Miss is it about how to use an Internet safely?

Teacher: Yes. In this lesson we are going to get the knowledge about how we have to use the Internet to gather information and to gain knowledge safely and protectively. (MS) Let us see the lesson tomorrow elaborately.

Student: Thank you Miss.

Model Micro Lesson - 2

Name of the Teacher Trainee	:	
Class	:	Peer Group
Skill	:	Skill of Reinforcement
Standard and subject	:	X Std. English
Topic	:	Flying with the moon on their wings.
Time	:	5 minutes
Date	:	

Components of the Skill

1. Movement (1)
2. Gestures (2)
3. Change in speech pattern (3)
4. Change in interaction style (4)
5. Focusing (5)
6. Oral Visual Switching (6)

Episode / Lesson Plan

Student: Good Morning, miss.

Teacher: Good Morning, students. I hope all of you know what is meant by living things?

Student: Living things – that which has life in it.

Teacher: Good. (1) Give few examples for the same.

Student: Animals, Birds, Human Beings and Plants

Teacher: Yes. (1) Animals, Birds, Human Beings and Plants are called living things.

Teacher: How do birds fly?

Student: With the help of their wings.

Teacher: (Smiles and ask the students to clap their hands. (2) Name some kinds of birds.

Student: Crow, Peacock, Sparrow, Wood pecker, Parrot, Crane

Teacher: Superb. (1) Have you seen birds flying in groups?

Student: Yes, miss

Teacher: Where do you think they are going?

Student: In search of food.

Teacher: Some birds have seasonal journey and at that time they go from one place to another. What is the specific term for it?

Student: (Silent)

Teacher: This is simple answer. I don't now how you will pass the exam. (3) Rajesh you tell.

Rajesh: Migration

Teacher: Excellent. (PVR) Migration or travelling means moving from one place to another. (R&R)

Teacher: So we see that every year during autumn and early winter the seasonal birds travel from their nesting place in the Northern region of Asia, Europe and America to the Southern, warmer land.

Teacher: When do they come back?

Student: During spring and early summer season.

Teacher: (Appreciates and also writes the answer on the black board) (2). OK students let us continue in the next class. Thank you.

Student: Thank you, miss.

Model Micro Lesson - 3

Name of the Teacher Trainee :
Class :

Peer Group

Teaching Skills

Skill	:	Skill of Probing
Standard and subject	:	X Std. English
Topic	:	Articles
Time	:	5 minutes
Date	:	

Components of the Skill

1. Prompting (P)
2. Seeking further information (SFI)
3. Re-Focusing (RF)
4. Re-Direction (RD)
5. Critical Awareness (CA)

Episode / Lesson Plan

Teacher: What is meant by articles? (P)

Student: a, an, the

Teacher: What else can you say? (SFI)

Student: (Silence)

Teacher: They are commonest general determiners that modify nouns. (Writes on the board) Well, what are the two types of articles? (SFI)

Student: Definite and Indefinite articles

Teacher: Good. What is an indefinite article? (P)

Student: a and an

Teacher: Can you give some examples to support your answer? (RF)

Student: a flower, a man, an ant, an orange

Teacher: Very good. What is a Definite article? (P)

Student: The

Teacher: How does it differ from Indefinite article? (RF)

Student: The sun

Teacher: Sorry, sit down, next (points to another student to elicit the answer) (RD)

Student: a and an are indefinite article and are used to talk about the person or things in an indefinite way whereas 'the' is used in a definite way.

Teacher: Excellent. Today we are going to study the Definite article 'the' in detail. Can you give an example for it? (P)

Student: 'The Ganga'

Student: 'The kaveri'

Teacher: (Writes the students answer on the board) why are you saying, 'The Ganga', 'The Kaveri', 'The Yamuna' and so on. (CA)

Student: We should use 'the' before proper nouns.

Teacher: That's right. (Draws a rough India map on the board). Well, can anyone say the names of the seas?

Student: The Indian Ocean, The Bay of Bengal, The Arabian sea

Teacher: Where should you use 'the'? (CA)

Student: We should use 'the' before the names of particular ones such as names of books, canals, rivers, seas, island etc.

Teacher: Good. (Pointing to each row) Give an example for each. (RF)

Student: The Bible, The Narmada, The Sahara, The Andaman

Teacher: Let us see it again in the next class.

2.4 Link Lesson

In micro teaching each teaching skill is taken separately and training is given in that skill. All these skills are combined in class teaching. In micro teaching importance is given to teaching skill then the content. In Link Lesson a small content and three or four teaching skills are taken. Importance is given for both content and teaching skills in link lesson. Here teacher trainee is teaching 10 - 15 students in 10 - 15 minutes. In this way if we give few teaching classes to the teacher-trainee to take link lessons and then if we send to class teaching, then it will be more useful. Link lesson is precedent to class teaching.

Micro teaching → Link Lesson → Class teaching

Understanding major Steps in teaching a Link Lesson

While preparing a Link lesson plan, the following steps are followed :

Designing a Link Lesson

The following steps are used in designing a Link Lesson plan.

1. Selecting a content / topic.
2. Setting Lesson objectives.
3. Resource materials needed.

4. Content outline
5. Teaching skills used
6. Instructional Procedures

1. Selecting a Content / topic

The first thing to consider obviously is what you want to teach. This should be based a unit / topic of your syllabus. You also need to be aware of what standard you are developing a topic plan and also the time given for your teaching.

2. Setting Lesson objectives

To make sure your topic plan will teach exactly what you want it to do, you need to develop clear and specific objectives. Note that objectives are the learning outcomes of the lesson. You can certainly have more than one objective for a topic plan.

3. Resource materials needed

Find out what resource materials you are giving to use to explain the topic plan and prepare it well in advance. Be sure the teacher will have materials everything to teach the topic. Power point presentation, Flash Cards, charts or materials are very helpful in teaching your topic.

4. Content outline

Write content key points to be presented.

5. Teaching Skills used

Write the name of the teaching skills used. While teaching a link lesson.

6. Instructional Procedures

1. Motivation
2. Presentation

3. Interaction
4. Reflection
5. Summing up

1. Motivation

Students are encourage and motivate to learn new knowledge. The mind of the child should be prepared to receive new knowledge. Preparation may involve.

1. Testing previous knowledge to learn new knowledge.
2. Integrating the previous knowledge with the new knowledge.
3. Arrest attention of the students using new techniques.
4. Announcing the aim of the lesson.

2. Presentation

Here teaching takes important place. Students learn new knowledge. For an effective learning outcome, teacher should ensure active student participation with the use of audio-visual aids. Teacher should stimulate thinking by asking number of questions while teaching.

3. Interaction

Interaction means the student teacher activities while teaching is going on in the class. Interaction leads learning. All interaction will take place to attain the objectives.

4. Reflection

A process of self-observation and self-evaluation is called reflection. By collecting information about what goes on in our classroom and by analysing and evaluating this information is called reflection. We identify and explore our success and failures. This may then lead to changes and improvements in teaching. Reflection can be given by self,

peer people or students. Reflection can also be seen with the help of audio and video recording of class teaching.

5. Summing up

After teaching a subject matter in a better way, it is better to close it in the same way. Then only the students feel pleasure and satisfaction. At the end of the lesson, it is necessary to make a quick review what has been taught, and repeating important points.

Practising a Link Lesson

Concept of Link teaching

Link Lesson plan

A Link lesson is a short lesson that provides instruction is one or more skills or concept that students will relate to a larger lesson plan that follow. Link lessons can be used to teach particular skills, create interest in a topic and generate questions or introduce strategies.

The art of teaching, writing, the Link lesson allows a teacher to convey a content or strategy to students that they will use often. It allows students to gain valuable relevant skills on a regular basis without spending too much of time to teach the same skills. The Link lesson should be short and its duration will be 15 to 20 minutes. Here the teacher introduce the topic, demonstrate skills or concept; guide student practice; discuss the topic; give more examples; and task about what was taught. Link lessons can be taught individually, in a small group or to a whole class.

Model Link Lesson Plan

Name of the Teacher Trainee : xxx

Date : xxx

Standard and Section : VII Std. C

Subject : English (Prose)

Unit : Prose - Diwakar - An Icon for Children

Topic : The first three paragraphs

Instructional objectives :

The Pupil

- Acquires knowledge about the differently abled people.
- Understands the self will and courage of the differently abled achievers.

- Comprehends the meaning of how the differently abled people try to manage their level best with the available sensory organs.
- Develops the skill of using the sensory organs with their different perceptions.

Instructional Resources Required

- Chart depicting different sensory organs
- Pictures of the differently abled achievers

Content outline

Motivation - Differently abled people - Diwakar visually challenged boy - sensory organs - Different perceptions. Recapitulation.

Teaching skills used :

1. Skill of introducing the Lesson
2. Skill of explaining
3. Skill of questioning
4. Skill of stimulus variation
5. Skill of Nonverbal cues
6. Skill of Reinforcement
7. Skill of closure
8. Skill of fluency in Communication

Instructional procedures

Content / Concept	Specification of behavioural and activities	Learning Experiences (Teacher/Learner activities)	Evaluation
Introductory Activities	Motivation	With the help of Language. Those who are blind, i.e., who cannot see.	How do you communicate in the society? Who is known as the visually challenged person?

Content / Concept	Specification of behavioural and activities	Learning Experiences (Teacher/Learner activities)	Evaluation
Development Activities "DIWAKAR-AN ICON FOR CHILDREN"	Presentation	Those person who are visually challenged or the speech and hearing impaired or whose hands and legs are impaired. Teacher shows the chart of the differently abled achievers - Helen Keller, Stephen Hawking.	Who are known as the differently abled person? Can you tell me the name of the differently abled achievers?
		Teacher tells the name of the lesson "DIWAKAR-AN ICON FOR CHILDREN"	What is the name of the lesson?
		ICON-a symbol or a small picture	What is meant by Icon?
	Interaction	Diwakar Sharma was born in 1992 in New Delhi. He is an Indian singer and the first visually-impaired child. Eyes, ears, nose, mouth, skin.	When and where was Diwakar born? Who is he?
			What are the five different sensory organs?

Content / Concept	Specification of behavioural and activities	Learning Experiences (Teacher/Learner activities)	Evaluation
Concluding Activities		Vision, Hearing/ listening, smell, taste, touch.	How are they useful for everyone?
		The teacher explains with the help of the chart about the different perceptions of the sensory organs.	Tell the different perceptions of the sensory organs.
	Reflection	Students gave the correct responses for all the questions.	How many sensory organs are there?
	Summing up	At the end the teacher recalled all the points explained. Tomorrow we are going to see how a group of VII students learnt a new language and a new way of looking at their lives.	What is meant by Auditory Perception? Who is one of the first visually challenged child artist?

Link Lesson - Episode

In the beginning section of this unit we have learnt various skills and their components. This must have significantly contributed to the qualitative improvement of teaching. Now we can integrate all those skills and use them in our teaching. It helps trainee to transfer effectively all the skills.

As episode learnt in the micro teaching on integration of teaching skills is given below for your guidance. Student teachers are asked to study it carefully and plan their practice of integration of teaching skills.

Skills to be integrated

Following skills are integrated and an episode is prepared.

1. Skill of Introducing the lesson
2. Skill of explaining
3. Skill of blackboard usage
4. Skill of questioning
5. Skill of probing questions
6. Skill of stimulus variation
7. Skill of Non-verbal cues
8. Skill of Reinforcement
9. Skill of closure

An episode linking all the above skills is given here under.

Link Lesson Episode

Class : VII

Subject : English (Prose)

Unit : Diwakar-an Icon for Children

Topic : First 3 paragraph

Teacher / Student	Teaching – Learning Activities	Skill components
Teacher	Good Morning Students.	Skill of Introducing
Students	Good Morning Miss.	
Teacher	How do you communicate with others?	Skill of Introducing
Students	By signs, gestures and language/ speech.	
Teacher	Good. We all communicate through the common verbal language for all kinds of communication.	Skill of Reinforcement
Student	Give one example for it.	Skill of questioning
Teacher	We communicate through our mother tongue – Tamil	
Student	(Nods the head) Then what does the differently abled person do?	Skill of Non-verbal cues
Teacher	They use signs and gestures.	
Teacher	Who are the differently abled people?	Skill of questioning

Teaching Skills

Teacher / Student	Teaching – Learning Activities	Skill components
Student	Those who are visually challenged physically challenged person.	
Teacher	Excellent. (The teacher shows the chart of some differently abled achievers) Can you recognize them?	Skill of Reinforcement Skill of Stimulus Variation Skill of questioning
Student	Hellen Keller, Stephen Hawking	
Teacher	Today we are going to see the lesson "DIWAKAR-AN ICON FOR CHILDREN". Explains about Diwakar Sharma a child who is visually challenged boy and also about the different sensory organs with their different perceptions.	Skill of Explaining
Teacher	What is meant by Icon?	Skill of questioning
Student	No response	
Teacher	Teacher explains it that Icon we use this word while using computer. Icon-a small picture or a symbol	
Teacher	Derick, When and where Diwakar was born?	Skill of questioning
Derick	Diwakar was born in 1992 in New Delhi.	
Teacher	(Claps hands) Joyce	Reinforcement

Teacher / Student	Teaching – Learning Activities	Skill components
	can you say, Who is he?	Skill of questioning
Joyce	He is a visually challenged Indian singer.	
Teacher	(pats her) Can anyone say how many sense organs are there and what are they?	Reinforcement Skill of questioning
Student	There are five sense organs namely eyes, ears, nose, mouth and skin.	
Teacher	What are the different perceptions of the sensory organs?	Skill of questioning
Student	No response	
Teacher	The teacher explains it with the help of the chart	Skill of explaining
Student	Nose – Smell Olfactory Perception	
Teacher	Let us see the important points discussed here. What is meant by Auditory Perception? Who is Diwakar Sharma? What is meant by Icon?	Skill of Closure

Teacher / Student	Teaching – Learning Activities	Skill components
Teacher	Tomorrow we are going to see how a group of VII students learnt a new language and a new way of looking at their lives.	Skill of Closure

Difference between microteaching, Link lesson and class teaching

Characteristics	Micro teaching	Link lesson	Class teaching
Time	5 - 6 minutes	15 - 20 minutes	40 - 45 minutes
No. of students	5 - 6	10 - 15	40 - 50
Content	Very Small content	Small content	One Lesson or part of it
Teaching skills	Only one skill	Three or four skill	Various skills
